

only Laserlite® has the technology

Laserlite® is the only polycarbonate corrugated sheet product in Australia featuring Advanced Weatherguard™ technology, a special protective material that is warranted to

- Extend the life of the sheet by up to 50%#
- Maintain sheet colour and clarity up to 50% longer#
- Provide 99.9% protection from UV rays up to 50% longer#
- Resist 25% larger hailstones#

With unrivalled technology and superior performance, it's clear why Laserlite® is part of the Australian outdoor lifestyle.

As compared to other polycarbonate corrugated sheet products such as Astrolite®

Up to 50% better heat reduction than standard corrugated sheet#

Comfort Cool™ keeps you cool and comfortable. Laserlite 3000 is the only polycarbonate roofing product to feature Comfort Cool™ Technology, special properties in the sheet that reflect the warming effect of the sun's rays to offer

- Up to 50% better heat reduction than standard corrugated sheet#
- reduced glare for ultimate comfort

HOW IT WORKS

UV rays, wind, hail and rain have the potential to make polycarbonate resins brittle and lose colour over time. Advanced Weatherguard™ protects the sheet and protects from harmful UV radiation.

HOW IT WORKS

Infra red light emitted by the sun passes through polycarbonate sheet making it warm underneath. Comfort Cool™ Technology reflects the heat away whilst letting visible light through with less glare.

only Laserlite has the warranty

Due to this unique technology Laserlite is the only polycarbonate roofing product in Australia to feature a Lifetime Platinum Warranty.*

*Refer to full warranty terms & conditions available from www.laserlite.com.au or a Bayer MaterialScience office.

the complete solution for a professional finish

When installed against a wall

Easy to install, Laserlite® has a quality range of accessories to make your installation complete and ensure a professional finish.

Refer to the Laserlite® installation guide prior to installation available from www.laserlite.com.au or a Bayer MaterialScience office and ensure safety recommendations are followed at all times.

Laserlite® One Shot® Time Saving Fixing System saves 50% installation time as no pre-drilling is required. They also feature a Class 4 coating for superior corrosion resistance and suitability for coastal areas.
